Dermatology scheduling *that works as hard as you do.*

Calarasome handles booking, deposits, insurance verification, and waitlists — fully automated, HIPAA-compliant, and built specifically for dermatology practices.

HIPAA COMPLIANT PLATFORM

THREE PROBLEMS CALARASOME SOLVES

01
No-shows with no recourse
Patients miss appointments with no penalty. Calarasome collects card authorization at booking — so you can capture the deposit if they don't show.

"Avg. $18K lost annually to no-shows"

02
Insurance verified too late
Patient arrives, insurance is denied. Same-day bookings trigger immediate alerts. Standard cases are caught the night before — not the morning of.

"2–4 hours lost per week to day-of failures"

03
Waitlists managed manually
Cancellations leave empty slots. Our tiered notification system alerts urgent patients first, then high priority, then standard — automatically.

"Manual lists fill only 40% of cancellations"

KEY FEATURES

PAYMENTS
Deposits that never cost you fees
Auth holds for bookings within 7 days — voidable at $0 if cancelled early. SetupIntent card-save for far-future bookings, transitioning to a hold at T-7. No refund fees, ever.

WAITLIST
Tiered waitlist that fills slots
When a slot opens: Urgent tier notified first, High tier after 15 mins, Standard after 45 mins. Slot claimed? All pending rounds are cancelled automatically.

INSURANCE
Verification before patients arrive
Same-day and critical bookings trigger real-time admin alerts. Admin queue shows all pending verifications grouped by urgency — verify or flag failed in one click.

HIPAA
Comms your patients can trust
Patients choose Standard or Private consent at booking. Private patients receive zero PHI in email — only a secure, 24-hour token link to verify their appointment details.

HOW IT WORKS

1
Set up your clinic
Add providers, configure schedules, set treatment types and deposit amounts. Go live in under a day — no code required.

2
Share your booking link
Drop your Calarasome URL on your website, Google profile, or ZocDoc. Patients complete a guided 6-step booking flow independently.

3
Manage from one dashboard
Every alert you need — failed payments, unverified insurance, shared-email flags — surfaced in priority order every morning.

PLATFORM GUARANTEES

10-Min Slot Hold
Race-condition-proof booking

Patient Matching
5-step duplicate prevention

DST-Safe Slots
UTC stored, Luxon-powered

Multi-Provider
Full dashboard with filters

Your next no-show is your last one.

Free 30-day pilot for qualifying practices.
Setup in under 24 hours. No commitment.
